

CLEAN & SAFE @ AIRCOS

CLEAN & SAFE @ AIRCOS

We are taking **proactive steps** forward by using a **360°** approach and working closely with our external partners and the group's companies.

This helps us meet the needs of our customers as we adapt to their DNA, their specifications and their environmental policies.

We have integrated the Clean & Safe philosophy into our approach to each new product development, manufacturing process and working method.

As part of a continuous process focused on improvement, our R&D and Operations teams work together and address the challenges linked to formulation and industrialisation to ensure that both the formulas and the finished products are sustainable, safe and effective for consumers all the while striving for the highest possible levels of ethics and transparency.

Ambition

The "Clean & Safe @ Aircos" policy ties in with our CSR strategy and our "**more sustainable solutions, products and processes**" pillar.

Philosophy

For us, clean beauty is more than a trend. It **implies global awareness of consumer needs and of the environmental concerns that affect us all. We believe that clean beauty should be unapologetically safe. As a result, Clean & Safe @ Aircos was born.**
